JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

April 19, 1901

*Report of immigrants inspected at the port of Cienfuegos, Cuba, during the month of March, 1901.*

Total number of immigrants inspected, 22; number passed, 22.

T. D. BERRY,  
Assistant Surgeon, U. S. M. H. S.

*Report from Havana.*

HAVANA, CUBA, April 8, 1901.

SIR: I have the honor to submit the following report of the transactions at this station for the week ended April 6, 1901:

There have been no cases of yellow fever reported during the week. The last case reported was on March 14. There have been no cases, no deaths, and no cases remaining on hand since March 24. The yellow fever report for the month of March, 1901, shows 5 cases with 1 death. This is an improvement over the same month of the preceding year, 1900, in which there were 11 cases and 5 deaths; but is not so good as the report for March, 1899, during which there were 2 cases with 1 death.

A diagnosis of yellow fever was made on the 2d instant in the case of the seaman removed from the transport *Rawlins* March 29, just prior to the sailing of that vessel for New York. The ship's surgeon claims that this man was not ashore at any of the Cuban ports touched at from March 18 to March 29, while the vessel was in these waters. The source of infection can not be traced, but in all probability was obtained on the south coast.

On April 3 quarantine officer at Sagua reported the steamship *Jessica* held in quarantine pending investigation of a suspicious case of fever on board. On the 6th, however, she was reported as released, the case not being yellow fever.

I inclose the usual statistics for the week.

Respectfully,

A. H. GLENNAN,  
Surgeon, U. S. M. H. S.,  
*Chief Quarantine Officer for the Island of Cuba.*

The SURGEON-GENERAL,  
*U. S. Marine-Hospital Service.*

[Inclosure.]

*Summary of transactions at Havana for week ended April 6, 1901.*

PASSENGER DEPARTMENT.

Number of passengers inspected.....	546
Number of passengers vaccinated .....	4

Enteric fever .....	2	Total number of deaths from all causes, 144	
Tuberculosis.....	18		

*The Doris fined for breaking quarantine.*

HAVANA, CUBA, April 11, 1901.

SIR: In reply to Bureau letter dated April 4, 1901 (R. M. W., W. P. W., E. B. S.), in regard to the fine imposed upon the American yacht *Doris*, I have to report as follows: On March 5 this office received a telegram from Acting Assistant Surgeon Gomez at Gibara stating that the *Doris* had arrived at his port from Banes without a bill of health. The passengers were allowed to land, but the vessel was held for instructions. Some time during the same night the *Doris* broke quarantine and left the harbor, destination unknown. Dispatches were sent from this office to north coast points to detain this vessel upon arrival. The *Doris* returned to Banes and a fine was imposed by the captain of the port for violation of harbor rules. It appeared to be a case of ignorance, and this small fine was imposed in a cautionary way, and turned over to the collector of customs.

Respectfully,

A. H. GLENNAN,  
Surgeon, U. S. M. H. S.,  
*Chief Quarantine Officer for the Island of Cuba.*

The SURGEON-GENERAL,  
U. S. Marine-Hospital Service.
